‘Boundless Darkness in the Day-Giant Sand Dunes’ Kumar’s Poetry..

‘Kumar’ is a flame. an awaker, an abridger, a pure voice. His poetry has no age. The philosophy seems to be the eternal movement in the way the feelings are moved, like the reality faced by a man who is always moving towards the shelter, with a hope for a rosy life, and with the joy of the fruitfulness. There are no apprehensions in his thoughts. There are no material limitations. There are no numbers for the stylish depictions. It is true that even the rising sun would disappear behind the clouds but nothing can stop and hide the dawn of his poetry. Everyone in the society has the right to live without deprivation. The experience of carrying around broken reflections is never till end. Inexhaustible human power, spring-like mind, many paths are the gateways to his poetry. I am very happy that once again Kumar’s new poetry seems to be dancing, before my eyes with the splendid stanzas of many feelings. All our minds shall be ready to explore the

infinite splendors in form of kites. That's why my pen stretched out its arms and touched those letters, standing in front of intellect like a sea.

“Grief is the imprint on the unrevoked spheres of stagnant constellations that releases Fahrenheit suffocations, another meek decision on the boundaries around” it is said. But nothing is supposed to happen this way. In fact, nothing should happen like this and merely stand like this nor would want to talk like this way not even live like this. This poem is an attempt to find those moments of confusion and shape them into letters and keep the image of the sun on the top of the mind. The lights that shine on earth are like butterflies in flight. Many questions are pointed on the face for which gladly explain with answers. Oneness runs with human society from age to age, where the heart is comforted and the ray of reason is resolved and moved.

It seems to me that everything is looking towards this poet. Their every movement seems to be traveling as a social force in their bodies. Because, a stormy wind jerking the heart while going in search of a peace. Temperance and relaxation could even become cold-mountain. Anything seems possible while reading his poetry. I strike some imagination like branches of a tree in the moon light intertwining which are to be parted compulsorily. As the branches of the sun seem to surround each other, the mind is sure to be freed, just as the brightness of the past has faded, and the footprints in man have disappeared, the visual world, the source of consciousness, is the new path of this poetic vision of the soul. It is a motion that makes sense to me that Kumar's eyes are always looking forward to the sound of a dream. That is the eternal sensation.

It is true that many people are not taught what Kumar's poetry is. Questions like what kickstarted poet's heart to start writing this way? The questions came to my doorstep which even knocked and greeted. But what is this man's poetry? Is it a text? Distraction literally? A Philosophy? Or a stream of characters flowing through a fantasy world? That is my doubt along with many others. But how to clear these doubts? Is it enough to ask the poet? Or is it enough by reading them? Listening to their expressions, I felt that no matter how comfortable I was in the water, I had to come back step on to the land. Whatever is lost, be it a memory, be it a circumstance or whatever, only the heat pounds. But, though familiar, does the morning speak? Does sleep tell us the truth that we live with sleep? Just as sky blue can be seen in water, there are many assumptions in hope. There are many untruths. At that time, it seemed that Kumar's poetry is the plane of hope that flies comfortably in the atmosphere of conflict, shouldering a lot of memories.

In this poem, if you read the words "After all the glasses in the kitchen have been broken / The colors are still weighing on the sleepy walls. When the walls of the fort fall down, the crown is seen to move here and there along with them in some form. The word "Lipi Lala" sounds like yellow glory to me. Tired! Rain as it is! A raging storm! The combined terror appeared as the third form of Lord Shiva. And what does it mean to filter it? It really felt like spring in the lap of nature. It looked as noble as the goodness that goes from the soil to the plant and from the plant to the mankind.

In my opinion, many people seem to have stopped reading poetry. Because if you read someone else's poetry and not your own, can you understand it? Poetry metrics are

being discussed, marked, honored or insulted without having read the doubts beforehand. Speculations are running from mouth to mouth without reading even a single sentence. There is no reason for this. As soon as the answer to the question “Who are you” is answered in the society as “I” which emerges from the human being, his different personality. If you ask this, you think you should say this, but by the time you say it, a different tone comes out. Different images come out before the eye. Then how difficult is it to say that this is the measure of this poetry? Isn't it wrong to think?

For example, on the ground where we are standing, a pot is carrying a tender plant. If it is available to us, we must immediately touch it with our fingers. Unknowingly, a smile is placed on our lips even if no one is there with us. The mind feels dewy. When we are alone, we grow very high with many thoughts. We experience a sense of exhilaration. We want to erase the life that happened once with a piece of chalk and join our mother's womb. We become as warm as we are inside. It is only a feeling in the mind but we experience it. Also, when we take the other person or the book in front of us in our hands, the thoughts of our past fall on those letters. Experiences weave those feelings. So that some opinion comes out of us through the mouth. That is why it seems that there is no stability in any one's mind, just as there is no truth in any opinion.

“Oh! Statue like man! You succumbed to the red sun. You are exposed to the cold wind. You have become a slave to the canopy of the sky that is wearing a dotted sari. There is a human history behind every letter. Behind every word is a picture of your personality. There is a social purpose behind

every expression. As I read Kumar's poetry, I felt like a man running with thoughts that are on fire. The body is becoming a weapon. There is no doubt that the mind hidden in zodiac is turning into a sword. This is the true light of poetry. That's why this poet says, "The decision is never clear..in the trap of death." It doesn't seem like it. Because there is an inner power behind the human heart just as there is a mind between languages. Concentration is taught to others only while suffering a pain. Also, only when the depths of poetry can be reached, it touches the hearts and makes people happy.

It is an unknown long poem. How long can a man walk around wearing deadly weapons? That is certainly the question. But the sure answer is that as long as the poet lives he can bear the weapons of letters. As the generation changes, history is seen in the child's face. There is actually no power in the person. There is an invisible group in the hearts that kill yesterday and seek peace today. It is eternal.

At the same time poetry does not burn with hatred, anger and even crisis. Such poetry will always shine like a seed of light. But it takes time to bear fruit. Because as the pain increases, the question becomes more complicated. Life becomes like a question when anger rises. It is the experience between these two that brings us closer to emotional liberation. A green tree outside the house is as natural as a warm life inside. There is a cold shadow in the man. There is an invisible fire within. There are people who are constantly cutting down trees. There are those who pour water. Knowingly or unknowingly, these qualities meet with each other in friendship. are mutually exclusive. But, there is a point of separation between the two. Its name is ideal. Poetry is the embodiment of that idealness.

Kumar usually uses many new words which are unknown combination of words in the literary world through each of his poems. While looking at the combination of general terminologies which at all we separate and read we tend to contradict, but when we read them together, we get a feeling of aptness. One cannot run into the sentences unless one reads Kumar's poetry completely and understands the inner meaning of that poetry. This poetry fills many aspirations from afar, like babies who pick things like dots placed in front and turn them into bouquets. The stars seem to be twinkling, but who can hear their sorrowful voice in the infinite universe except a poet? We see the darkness of the moon as friends but who understands the misery behind them except a poet!

This Kumar's poetry is the conflict between darkness and light, universe and creation, and nature and nature. Man sees whether he has eyes or not. This book is a sensitivity that moves between that clarity and ambiguity. This poetry is the invisible heart. This poetry is humanity in discovery. No moment in life is a sign of pause. Ignorance is not an excuse. The wave that rises from time to time in the sea is new. It is an illusion to think that the night has given a deep silence to this sea which is always renewed with new waves. There is no end to these waves.

Human history has no end..Between the breath and the turmoil, whether it is peace or unrest, it always emerges. Who has the courage to comfort when faced with any kind of disruption?.. Where is the machine that can restore the human psyche no matter how much it has lost? Which idealness will work to bring back lost humanity? What epic works to mend the wounded society, the bleeding bodies, the dirty psyches,

the rusted and moldy feelings? The answer to these questions cannot be found no matter how much you search. But poetry has that power and tact. Sweetness of poetry is delivered only by a poet of this kind, especially in books like this. It is in Kumar's ideology, which is always built in the poetic lineage. Let us all welcome...

Kumar is hence a poet of instinct and at the same time a story writer, Novelist, Play writer, Lyricist- not but not the least of late he is proving to be a Screen Play writer. Therefore, his capability is reaching new horizons undoubtedly as with this poem "Art of Infinity" he is making a grand entry into English and I congratulate him and wish him with many more leaps.

SAILAJA MITHRA

Vivid Thoughts of Imagination...

Mr. B.S.M. Kumar is a multi-talented artist, he has many skills and is a neologist. He makes new words and conveys to us many colorful thoughts. Up till now he has created new words of his own soul ultimately preaches to us. He has not prose poet as some critics felt. He is a polymath, just like Leonardo da Vince, Kumar is an Engineer, script writer, poet and finally wishes to produce and direct a picture of his own thoughts and merits. To tell simply he is a poetic impressionist painter or prose artist of many paintings that he dreamt every minute and each second. He is a poet a storyteller and novelist and a dreamer of his own style and path. Kumar has peculiar ideas and thoughts. He has a different person in Telugu literature, there is so many poems, stories and novels of his style which are published and hundreds of books and writings that are not come into limelight. He doesn't want any famous for his literature and try to keep his in adornment as a writer

in all these years.

As I have already told Art of infinity is undrawn painting or man wrote drama. It is theological version of void theory which is closely associated with the contemplation of emptiness and his human attempts to define the art and artist desires that are not fulfilled even his dreams or his real life. Even though we are human beings, but poets, painters and artists have the tendency of Aliens behavior to truly speaks Kumar always in creativity field looks to me as an alien artist. If we want to understand the meaning in an art piece, it is a waste of thought. Because in this world of artists meaning has no meaning. Because artists are really to speak are anarchists of this withering individualist state of mind. In this book every word and thought desires a complete liberation from all these shackles and fetters even is a dream of word that we belong. In every dream the body is alien to the state of mind and personal emotions lead as tempting factor of soul.

Sleep is so necessary to our health, human beings spent 1/3 of their lives sleeping. We really don't know the secrets of our sleep. There is still so much to learn about sleep and its necessity is that just crucial to good health. In the Art of Infinity Kumar discusses different stages of dreams in the artist's mind philosophically which is new to the mankind of an artist. He explores the meaning of sleep, dream, and personal sadness of artists emotions.

Dream is considered as the play of mind in a short period but in artists dreams are mysterious and exciting stories and incidents may continuously chase for a good plot to a novel or a drama and an artists new painting. There are so many artists who agrees that their dreams are main cause

anddeemed to be a dream of dreams.

Our own awareness exists in three stages.

1) Jagrat(awakefulstage) 2) Swapna (Dreamstage) 3) Sushupta (dream less deep stage). Normal human beings alternatively remain in any one of these states every day, continuously lifelong. So many believe that during sleep we play with our Atman. JagratAvastha and SwapnaAvastha are simply the plays of mind. Dream may provide some fears and doubts on symbolic mode we can analyze these dreams and interpretthem, some symbols may tell us about our goal and future, some dreams may caution about our nymph and love and of great masturbation of art and practice of our death travelling and fears. Each dream of an artist as blessing for a new masterpiece of poetic painting of a song. Ultimately dream means art. An infinity art of dream and death in a portrait and portrait of an artist is infinity of art.

2nd Chapter

Infinity plus infinity is art. We can't treat infinity like a number, but it is a concept of universe and art means universe of infinity. Meaning is infinity hence art has no meaning because it is boundless with images and sounds of diversity.

Art of infinity wrote by the great philosopher Sri B.S.M. Kumar is a marvelous book contains mainly 5 Chapters along with introduction chapter. Except the third chapter which has 7 subchapters remaining all chapters are with 6 Sub chapters. Each chapter contains an introduction with the beginning of the essay. Here I will try to mention some main points of this book in my tone note in the alien tone of writer. Because the voice of B.S.M.Kumar is somewhat near

to deconstruction theory Jean Jacques, Derrida, which show that the meaning of a work is unstable and could not easily be the center as it could be marginal, Kumar also believe that meaning is unstable and that possibilities should be considered and Kumar beliefs apply to the literature and unconscious dreams are related to language of social phenomena. We can determine that all meaning of a work totally unstable, and a free play is achieved in which readers realize that either meaning is equally possible. What the deconstruction theory preaches to us.

In the introduction chapter Kumar points out that "The fundamental dream energy secures the dream with unknown meaning". Even dreams raise the confusion on creativity. The dream may forget his dream and tries to remember it, Writers generally try to recall the meaning of the dream. But some talented writers keeping aside their confusion try to take main aspect of their dreams into their creativity field, which are somewhat accidental. Kumar feels that 'thought layers refine the sound of words, with confused vision spectrum with kinetic energy of dream'.

Here thought is a modified rear view of life to dip into the truthful zone for various dream sequels to narrate the poet word mechanism where it points to a certain complexity between writing and text their implying that writing and human communication more generally entail the risk of misunderstanding. There is a difference between dreamer and his speech during sleep. In this case writing them serves as supplement which takes place of a dream of artist.

In death chambers couplets music illusion chapter Kumar expresses that "words not exactly designed for carrying the right emotions, it inculcates with illusions to

create the white dreams."

These lines are what Kumar emphasizes, require our constant attention and are against to the traditional philosophical concept. These all are new to the world of our present artists, we cannot estimate Kumar philosophy which touches to new concept and new theories of post, post modernism.

To according to Kumar new concept" thought is an illusion of dream sequelsto imbibe with definite colour of identifications to dedicate the momentum of delusion... (1-4 crystallized dream clips This subchapter the primery connection of dream. decoded night links interruption) Finally Kumar conveys at the end of prolonging the" journey into infinity."

Here Vincent van Gogh Quotes "I dream of painting and then I paint my dream", with these famous words we can understand art and dream are fundamental and constant to reality of art and its journey. During sleep of our brain is a living theatre with nude performance pushing into infinity."

Dream is communication to an artist to raise the voice with coefficient modulations of deep breath elevations to set the process for every solidification to secure and raise the voice of creativity (Chapter2... Dark placements). Kumartheories regarding art are related to abstract expressionism, moving away from previous conventions of modern theories and their center ideas and claims all texts have ambiguity in brief some which have more than one meaning. Hence the voice of creativity is dreaming communication with empty solidifications. The artist'senergy

is the source of ultimate creativity with own voice and communication with coefficient modulations with deep breath elevations. These are all stage of deep sleep of an artist communication capacity.

"The thought is coming from reverse mode of sound; sailings to derive the body colors of defective corner of hearts to filter the affection tested of Art "(2nd Chapter 1 Dark Streetillusions. has understand takes).

The soul dark state with night theories agitates the illusions to react the vacuum portals of life. In this book the language and narration are so different to the common reader; here Kumar naturally used the dream reality way where the voice is a voice of dream, the structure of grammar is set aside, and it is new language of art of infinity, where stream of conscious play a more role in designing the main text. But if we pay Some keen attention then the narration catches you profoundly without any difficulty.

In the era of globalization how the existentialism and the conversation consist mostly of the liners respective and often covering mundane and superficial topics that never speak openly but it represents that absurdity of our doubts to find something with the impression that it is the end of the art, and it means not from God and is entirely determined by ourselves in occasionally sportive way of our own dreams.

"Artist is a creative dream partner with illusions to define the body of settled dream layers to secure that locking of poetry". (Chapter 2, Sub chapter 5. secrete bath pages... alone clubs. neutral body coding).

In Kumar's view, the Dream is not a daring element or

confused agenda of mutual resolutions of truth and surpass the drive forces of life with ultimate key functioned drive of imagination. Artists always try to understand the meaning of life, but his accusation defines the creative center of implementation. The eliminated body souls filter the effective visuals of corrective imperatives to dazzle the heart at high fundamental height to narrative the musical thread of dark listening (Chaper2 Secured night rooms) matters. The elemental gate shares the pain, and those songs sail towards infinity to stabilize the dream signatures to unknown house which try to understand the dream and its truth.

Chapter 3

Kumar reiterates the following statements very deeply his observations on secrete tunes.

'Secretive tunes start the dream with art of tough end to define the sound of erosion and implicate the visual theory circle of art'.

The defective colourcircles draw the soul imprints to raise the objective narrations of truth at utmost level of dream with confused state of souls.

"The drama of inner clipping pages with draw the reversal forces of body solutions to define the creative revolutions of art."

Equal emotion of dream factors agony tries to convert the sustained dream & conveys the final secretes of artists method of recreating dream into original pain which represents the colours and artists mood which incarnate the painting.

In Kumar's vision art not only judges the solid and liquid

stages but also define the stage of vapour also. It is main point in his philosophy.

A time is expansion of both end corners of vision and dream is effective centric erosion of image do draw the final attention of life.

This statement of Kumar is very effective in the projection of creativity field & abilities.

Creativity is struggling with infinity listings to dedicate the thought into reflection image of confusions to erect the dark routes of streets.

Poet is not having any individual course factors; it is collective form of the dark periods and time. Collective emotion of art narrates the truthful terminology of art. In Kumar's view art is an integral part of dream and defines the modesty of art.

Typically, Kumar indicates that 'Her' defective signs start narrating factor of creativity energy and power of images build the emotions with gravitational reflections. Here he says.

"Infinity is an image of constructive thought to accumulate the design levels of reality to surrounded factors of truthfulness which define the infinity level of art."

(3rd Chapter - Sub chapter 5 " Polaroid status gallery... breathe of elastic hearts)

In his view "the common factor of fear seduces the truth into typical anxiety of art modules set the design of poetry. The souls try to set the journey of poetry into lives, where the heart and defective illusions tighten the locks on her personal roles.

Creativity can be achieved by dreams, set dreams cannot be cultivated by creativity. In my observation a poet can not

try to alter his own body or soul speeches; Where artists fail
Kumar raises as a dead artist of old testaments.

Kumar text and narrations may not be to this world,
but to universe of Infinity. Kumar is a poetic expression but
the beginning of a new concept of unborn child's smile with
mother's womb of an artist.

"Understanding to write the common identity of an
artist. Ultimate corners of an art circulate the power factors
of individual drive elements to construct the house of
defective origin factors sustain with uncommon doubts to
penetrate the pain at infinity levels...

"There is specific shape of truth to construct the art and
art is trying to collide and correlate with infinity... relevant
dreams infinity of art.

Naturally it is a defective nature of an artist to comprise
with Block history of a man.

In art of Infinity the narrator openly conveys her dreams
of nudity before death chamber where she tries to intimate
colored chapters of her thought we may conclude She is the
nature, or She is the earth or may be Chandidas Heroine
SWAPNA RAGA LEENA She describes her love towards
... nothingness is anything.

"The common song of night longitudes defines the
dance sequel at one end of the earth and those specific images
filtered with her death moaning of art efficacies".

(Chapter 4.. Final cord of calmative laughs)

Where thought is an integral part of life and this heavenly
art narrating the colour implicated the visionary dream setting
to define the poetical universes and the unique imaginary art

with mute expressions of dark page of human sexual limitations which the dreams portraits in the creativity.

"All the inter connective thought layers filled with dreams coordinates and collide with truth factors of life."

(Chapter 4 Final cord of calmativ thought)

The basic theory of this book is dream reality of solid, liquid and vapour stages of art which attained the higher stages of portrait that she or her images and dances in the theater are sung lonely with suicidal tendencies with ultimate mutual co-circles of dream with proper designed orbits to tackle the rules of poetic lenses container that transport poetic lines in her dance of Nataraza mudras in a temple of sabhapathi which is unique key yields of soul chakra.. diffused secrete lines with hallucination of objective theory to connect with circle of thought secured with her dream senses to convey the final thought for entering infinity.

"Defective key patterns breaking the mirror images melting the body with screams and those unwanted pain circulate the reversal flow of character assassinations to emote the poetical expressions and truly immersed alter personal room."

(Chapert4/2 Man alone rooms...mirror of altitude reflection)

Above para picks 'emote' word which means to give expression to emotion especially in acting in a stage or movie role. Kumar in a flow of his narration picks such rare words in this book which reflective a dictionary which indicates his authority or power in this poetic dream speech "surrounded with sound chakras drive the imperfect way of journey to reach the death bed".

(4. Eye of guilt rooms... pre-eco unique reflections)

"Artist self-chambers filled with her breath and those corrupted voice of subedited reflections separate the reversal flow of emotion."

"Secured divorces to elevate her character discrimination to evolve the dream with artful mature of thought circles and energy portions dive into the page of elongate image circles of creativity."

...Which makes the poetical objective theory of creativity.

(4) 5 Charging guest calls... house of art diffusions. back doors of death.

"The creative struggling elements to convert into liquid state to induce the proactive forces and dazzle with her house of dream sequential or dark and finally discourses the death motives of creative life.

Finally in Chapter 4 Kumar declares "life is an integral part of art with her unplugging song to elaborate the cubical steer gaps of thoughts.

Chapter 5

Poets ultimate signature is engaging with common elevated roles of known streets.

The game of individual privacy is denoting the key secrets of life to elevate the art form for finding the actual phenomenon of creativity with death monograms and those centric objectives set the frequency of sound for narrating the story on poetry.

Here Kumar declares that her death chamber and poets' dreams are dealt in this infinity of art is narration of story on poetry.

The "suspicious dark evaporated statues defining to

solidify the fuel to blast the emotions to verify of life with a susceptible up bringing of creativity.

Her souls of strings narrate the story of incredible nature and cultivate with dark sentences to draw the actual force of death" with common ground of creative images.

All these creative vibes secure the tighten intervals to erect the doors of firing elements and those listing of forces define the artistic forces of natural raising of poetical uplifts and tries to paint the infinity.

Here Kumar declares "The connective measure of elevated street gaps the dream of conscious awareness to construct the objective measure of poetic illusions" to meaning the personal chamber of death elements on this book death chambers indicates the main character is the death itself apart from art.

In Kumar philosophy life is hall of emotional and another hall of confused projection of pain and agony of creativity to travel around the life with suggestive dream factors of creativity and continuously evaporates to open the images up to infinity.

Time is not a design factor of poetry and freezing factor of image and nonspecific visual flow along with dark sleeps to define the common objective struggling of life."

(5/3 Dream eccentric doubts... her own similarities)

She is painting her own tone with sound less canvas and drive fronts to collect the dream of effective drive line majestic journey invents to find out the routes of truthful inventions of life.

Dreams are singular way of changes to define the poetical restoration to define the darkness of life connective measures.

The perfect ritual looks to pour the weightless souls in her bag to reach the final creative theme layers of infinity.

Art of infinity is manifestation of creativity of an artist and his dreams that fruitfully lead to an epic stated void. It is a great book on art till now no philosophy has touched this way of thought with dream reality as a main factor. I congratulate Mr. B.S.M. Kumar in proving his talent on this rare subject with vividness of thoughts of imagination.

Art of infinity

Sensual night dreams mixed with emotions and defective word calamities dive into breath of selective night to elevate her personal writing room and intersecting death motives to freezing with ultimate voice of dream sequels to define the life. She herself sinking in suspicious thoughts revolving around the room with imbibing dark souls of calamity circles... destiny of diffused bodies to engulfed with oscillated breath portals and control the surroundings with vibes of colourful souls. The destination not to finish with abrupt key factors of thought and bounds with circumferential confusions and unjustified limitations. The effective circles of visual listing to humiliate the time factors and adjust the span of an artist life.

Colourful lining of defective soul rooms stirs

with defined line of body alternatives. The perfect visuals of woman galleries sensualising the defective dead screams; they cremate the timeline of art and erect the epitome of life journeys. She is not differentiating and the same time not to accept with me to sleep on my left side to making noises in the dream up to reach of my deathbed. She is making a special sound with Conch to astonish the breathing zones of dark street temple, those muladhara spectrum fills with eternity of colours, sound and visual coefficient of dreams.

Reactive priorities distilled the emotions to connected with eye joints, combination of key fronts illuminated the house with distinguished talk that includes endless images. Communication may affect the zero accuracy of thought and turned with dark image of personal emotions. The collective factors of soul evolutions and ignited the night key to open the dancing illusions and drive into infinity levels to find out the origin of art. All these observations with key cultivated thought limitations disturbed at one end and reach to constrained thoughts of life and revolution of dead equations whirling with tempting factors of souls.

The collective fundamentals of self-doubted globes revolving around the settled corners of life and those steps define the elastic visuals of understanding to reduce the volume of our own invented voices. Body recovers with emotions of deadly effective zeal's and define the night aspects of reasonings settle under the evolutions of basic alerts and those defined changes sets the drama with souls. Distance is the basic factor of dilution of the emotion and key line of reactions en-large in suffocated rooms of personal sadness try to elevate the human course of dream.

The Dream is a settled design of confusions and those

different centric circles whirl into the thought zone and reactive body rhythms seduces the truth with ultimate confusions between idea and self. Effective body sealings deform the thinking capabilities with the beauty to reach the last door and those selective houses open the locks with confused polarities ready and open the night of fine tune soul altitudes.

The diffused life sentences set the night song with unturned soul factors, illusions set the semi ritual zone of dry rooms... the survived dream of conscious awareness not to give any clarity of unknown facts, erect with solid lifeline of the emotion. Half circle parameters set the life into dual pages and tune the final cord of thought, but not to agree to quit the hall of fame. All design factor of emotions set the key openings draw the emotional dream to collided with destiny of orifices to set the triangular effective understandings disturb the ruling evolutions of creativity.

Soul related personal identities differentiate with an dark leaflets of life, it is not directly touching the key vision and emulsified with ritual narrations of purified illusions. Room of dark listings touches the restoration limits of death for horrifying the formulas of art. She never accepts the key line resolutions of creative abilities and not to justify the same without committing their inter course of body rooms. The problem of continuity levels failure to connect with highness of secured words and collective dream sources pour the zeal of identity with crushing elements of souls.

Dream is not a mechanical vibration of connectivity; most uncommon identities draw the message of visual destiny and surpassing controls derive the freshness of destiny curves to understand the body is ultimate ledger of

memories. The body cumulative breathing bags and those narrated empties fill with wholeness of vision to suspect the daily enthusiasm of art. The pages of dream portals and that context of journey defines the fear of truthfulness. Unable to leave the identity to surpass the energy with gigantic memories of dead souls. The image of soul spectrum to distil the colour of understanding to elevate the word of final listings to decorate the emotions into practical way of self-page erosions.

Accumulated design lines de-rail with epi-centric dream visuals to set the collective routes of distance rooms, formulation of firing alters to stir the emotional differences of route fronts to define the colour solicited norms. The dark fillers of dream curves to define the body elements and those connective visions oscillating here and there to suffocate the energy of heart. The creativity of determined journey to reach the fine tune song of segmented truth and settled assemblies cracks the thought process and eliminate with tighten leaflets of dream. The poet's dry land is open the epitome of pain to elongate with woman of sensual reactions to resonate the colour of distilled evaporations for sets the doors of locking worries.

Open periphery of art liaisons distinguished suffocations of heart joints and those fabric screens reduce the self-doubt of creativity. All these confusions and gap of understandings circulated in the dream of personal pages to bind the secure resolutions of dream to darken the effective briefings of original agony with surreal images of personal identity. The image spectrum peeps the strength of creativity and those free soul drives connect with knot of pillars to destroy the erotic tones of mutual differences. Ultimate dream co-

reactions distances with breath and coupled with self-esteemed day prints of digital dairy with known password of death.

Life is an uncertain agenda with secured night dreams to travel along the emotional orbits to elevate the heart resonances to travel along mutual reflection of creativity. The visual spectrum of life to astonished elements of poetic images to travel into her personal rooms for elevating the energy drops of words and those defined factors refine the active mode of tough lines. Every aspect of corrective vision raises the confusion on creative mechanism and those body sequels erect the emotional front of woman's secured vision.

Poetical dream segregates the images with a low tone and highlighting the agenda of understanding surpass the dream modules for reflective measure of creative surroundings to draw the confused destinies of day centres. The Energy is transformed diversity of image forum to neutralize the secured visions for maintain the alertness of thought. The fundamental dream energy secures the dream with an unknown meaning and those high frequency sustained energies tighten the locks with kinetic energy of dream. Confused vision spectrum to neutralize the energy and those secure thought layers refine the sound of words.

Thought is a modified rear-view of life with an incidental dismantling segment to drive the mechanized security openings to dip into the truthful zone for making the notional centric life into various dream sequential projections for narrate the story of poet. All those non connective pages decrease the tightened dream inserts to raise the effective terminology to implicate the dream saturations to define the word mechanism and non-refreshed dream rooms taking the

bottle of life and those converted breaths taking the independent elaboration of energy portals.

All individuals feelingsmaking of her house without walls and those sound boarders keeping around the life monitor for uplift the emotion into unique resolutions for impure the vision of sectional gallery to raise the voice of song portals to check the breathing elevations of desired fractions to withdraw the energy of dark leverages to erect the life. Life is a magical motto of images and dream is uncommon segments to drive into natural flow of breath and those modesty yards evaporated into the objective terminology and spread into the higher awaited rejections of dream measurements to erect the life with a different colour design fronts to making the poem.

Collective emerged dream motives convey the mutual motivations of art to define the orbital confusions directly travel into your images and those confused fusions to testify the energy modesties to decorate the words to elevate the beauty to jointing the protectional imprints of thought and indirect tough languages convey the emotions to secure the meaning of communication.

She is having the note at higher frequency and those mused nights disturb the emotional rotativity to distil the electrified dream sequels to establish the orifice of dream to secure the vision of poetry with owing elements of life centres. CHAPTER -1

Confused illusions... destiny of oldest cities...

Diffused day rooms raise the barking voices with mystified souls, start the dance in the middle of house, it will createthe horizon of feelings and re-set the aim of dark galleries. Alternate key entries disturbing the footprints of dream calamities, personal collapsible night fronts to design the pages of feelings and align with heart zones. The collective universal systems not able to analyse the exact key limits of confused illusions.

Her personal diversity of thought will circulate the emotions in reversal direction for settling origin of filtered pains. Death at epicentres zone to construct the body oscillations to enlarge the sizzling story of unique alerts of art. Cultivate boredom neutralize

the aspects of confused illusions to tighten the door of dark house to differentiate the word velocities to excavate the meaning of fundamentals.

Poetry is beyond infinity to accelerate the orbit of fine tune visions with yesterday's song wet with mystic destiny of fusion the limitations to define the set right levels of emotions and those colour pages rearrange the patterns. The common approaches of diffused circles to finish the laughs at their own hill station and claim the natural aspects of art destination to design the parameters of life. Life sustained elements of creative nights for settle the program of fine tune songs with one end of entry to freeze the heart at unwanted theory of understandings to set right the corner of dialectical dialogue deliveries raise the efforts of her calls. The connective parallel lines of dream saturations whirling with refused rehearsals of an eye to drive the return line of thought. The prefix theory of her personal views to dazzles the words with secure core of sound and visual eccentric pain reaches the elevated body system of erection to define the poetic theory of dream.

The wave of body curling pages to screwing the dark layers of soul circles, those epicentres taking the key permutations of body to impute with her flesh. Jolting of key forwards to elevate the destiny of human galleries to erect the poet's pages at the end of breath. The destiny of unique understandings dilutes the key line of infusing art distilleries to evacuate the design factors of dream and those sounds trying to cut the deal Infront of dream. Dream is not a completely cumulative universe of life, it's circulate into orbit of dark hills and secrete energies of demolition visuals to elevate the body critical factors of resolution theory

of breathing intervals. Every interval is mishearing heart elements of life to vibrate with her own elements to prepare the art of recreations to tighten the heavy limits of art. Perfection not an theory factor and actual anonymity of blood sizzles with drive body to prepare with an alert mechanism of personal alarm to know the right man in her room, differentiating the dream drives into higher plane of visual confusions to dense the situation and converts into art to define the secrete of word estimations to evaluate the identity of perfect restoration to reveal with crossing visual spectrum of in house drawings.

Disturbed day body prints excavate the eye polarities and suggestive colour layers tighten the thoughts with sequential confusions. Art of infinity starts their illusions with key parameters and linking with breath gaps of lucid fronts of truth. Sound of breath re-correct the voice portals and key ignited reflections to define the poem of her emotion. She reacts in all the ways and construct the death polarities at end corners of the Earth. Orbits what they conveyed and what they built in heart to dazzle the sealing doors of emotions to design the body of her listings to settle the key line of fine tune resolutions to find out the restricted ways of diffused dark peripheries of heart to filter the design of illusions and key fronts of her personal impressions.

The destiny of defective visions set the day line of vacuum erosions to draw the secrete line barriers of thought intervals to erect the body with emotional listing of view essences to draw the internal source of energy. Every effective creation to reduce the voice of unique sources to design the factor of safety with creative visual line boundaries to design the poem. Poetry secrecy is set the tone of understanding to

agitate the truth of guideline factors to design the elemental suffocations of joining elevations of dream. The suffix coding symbols to design the hearts with sensual key corners of emotional level of dark secretes to reduce the voice parameters of colours to dive into circular motion of creativity.

The distilled affections set right the drama of key roles having personal agony of tighten the secured vision of darkest night visual to build the gallery of soul jars to eliminate the effective boring solutions and de-centric universal noises set the dream on peripheral longevity of the emotion. Every thought is having their own identity and cross the energy pattern of night dream ignites the design aspects of key eliminated resources of visual moulds of body. Lot of struggle free walls derailed with personal heart altitudes to dazzle the diffused affection of breath solids dive into personal chamber of rooms. Secured design lines round around the final co-limit of soul certainties to erect the fundamental confusions of design lines and crossing with poetry to dense the elevated rear fronts of images.

Ultimate dream reels adjust the dynamic prints of long nights and seduce the voiceless colours to indicate the dark muses of thought. Centrifugal collective confusions drive with breath solvents to define the body collective feelings. Effective restoration level of the emotions imbibed with your emotional leads to adjust the eye belongings of dream. Lot of illusions sets the defective roots of creativity jumping into the eye salient features of house. Sizzling key factors tune the motive of death line whispers and reflective measure of songs drive into dreams of her mirrors to reach the destiny of sensual souls.

Circumferential feelings and dream visuals define the night limitations to protect the emotional defects and secure the reversal program of energy check the logical connections of effective body certainties. Body of motivational dialogues arguing with emotional prints of souls and those designed doubts are elevate the pages of fake intelligence of creative visualisation tighten the heart moulds with secretive body solutions to ultimately define the walls. Her music rooms set the song of death with inclined voice dreams to sustain the symmetrical life solids to distil the breath.

The night of corresponding energy illusions defines the body solutions and address the common portal of fuel leaflets to secure the incidental image of personal stories to clip with emotion. The ultimate true factors of dream realisations to fluctuate with reversal energy of violated radians to secure the creative field of infinity levels.

Journey is not a magical movement and illusions to set right the target elements of creative urges to find out the actual reasoning ability of poetry. Her imperfect doubts evolve with rear flow objectives of defined visuals to narrate the story of creative origins and those poetic hill stations leave the houses with dark dazzles and extending the experimental obligations to erect the continual breath power of constructive doubts with an eco-centric systemised dream corner of life.

1. Death chambers... Couplets... music illusions

Raise the density of dark footprints appear on the day line of life, breathing dilutions set the distances of time limits, retrospect of mirror images to prepares the soul of bodies, half of the time captured the emotions to distilled with in death

chambers to erect the emotions. Song of defined couplets to reduce the outer noise and limitation may expand and selective images to spread the sadness and increase the dampness of heart. Reflective body tighten horizons to refine the truth of effective variations to drive the circle of starting's to mitigate the visual appearances of art. The elemental stroke of art elevations to secure the drive factors of night dreams to connect the breath gap of hills and those couplets of systemised colour combinations narrate the story.

Those secrete voices found the frequencies to drive the body layers of settled dreams. Pages of dialectical drama perform on the ground with a soul and typical illusions sets the phrase of her song. Song replica of imperfect thought and thought reduce the weight of words. Words not exactly designed for carrying the right emotions, it inculcates with illusions to create the white dreams. Individual dream lines inter crossing with defined finer layers of art to draw the reversal monogamy of indicative value chain of fundamental differences of drive factors and sets the neutral evolutions of eye raised day stalls.

Blue rooms defining the corner door of secretes, reflective body rhythms construct the relative joining reason of thoughts, double crossings accuracies dilute the emotions to set right things of life. She is not mine and her voice not to concern with earlier dreams and those suggestive routings confuse the dark body pain to construct the night after the dreams. She is carrying common death from greave yard and colourful soil melt in her own rivers to filled with glass of visions. Breaking elements of souls driven into horrifying zones of effective dark dreams to elevate the human pages of agenda to secure the art altitudes of deviations. The

emotional key of unique designs gripping the dark level of silhouettes to find out semi-understanding zone of visual dynasty to reduce the frequency of voice level and to reach the destiny of tough end seas.

Body is self-discriminative breath chamber to sensualize the tuning of final cords to the end efforts of dark elements. These elements fill the emptiness of designed dreams and soul of final co- effective body lines to resolute with human dilemma to dedicate the soul into orbits. Her personal key limitations reflecting on personal zeal of illusions to decorate the dark house of white hills. Those dead seas freeze the waves of emotions and define the key era of de-linking areas to tease the sound of final intimations to reach her personal room fills with rain of dark dreams. She herself sets the definition of soul and those dark tunings affecting the confused bodies to reach the destiny of desired key front to formulate the life at one end of earth and those locking particulars admits the mistakes.

Illusions trying to settle with song and corrective thought lines dump into empty souls. The crystallisation of unique senses designs the night houses, those filled with illusions of death. Death is common factor of emotional breaking and continuously repeats with layer of understanding to distil the truthfulness of body to drive the orbits of poetic gravitations to construct the room of personal intimacy. Differentiation of art forms convey the universal agony of realisations to define the tested galleries of emotions with effective key settlers to explore the house of constructive body chiselling rooms. A poem starts the journey on reflective zone, rain defuse the elements of clarity and dusty eye colours to drive the picture screw of fundamental obligations to re-

erect the thought of dream layers.

Consumed minutes' drivearound the death monitor to elevate the centric emotion of art to abrupt dream sectional view reserve the energy and tighten the door of emotional life gallery isplay the fear to impactive body sizzling's narrate the dream of souls. Fusion factors of dark matters built the body without soul and creative gaps to unsecure with breath and those silhouettes expand up to infinity to erect the poet's life. Every typical word raises their own velocity to reach the destiny of ignited down streams of personal feelings to fill with own colour of thought origins to drive into perfect corners of diffused understandings. Rhythm of confusions settle the end limit of finest realism to step into dark resolutions and define the estimated voices to drive the key function of body. Thought is continuously igniting the propelling salient infinity origins of known destinies and diversified the breathing elements to segregate the soul frequency of truthfulness.

She calls her poet's stupid emotions and burn the house of ruin factors ready to construct the densified ruling lines of dead signals. Her colour of deadly dream periphery levels resists the eye mudras, and those key emotions dazzle the night of surrounding aspects to reach the destiny of dark globe lighter weight steps to open the secured visions.

The destiny of secrete layers to reach the dreams with defined elements and set the logical epitomes of heart to derive with final conclusions but, those elements mingling with body driving element of thoughts also set the combination of energy to infinity. Art is the portal of

confused interactions and reach the reflective seal fronts of agony to dilute the vision of entertaining circles to reach the design factors of life. The cumulative efforts design the human emotions to reach the destiny of dream to excavate the peripheral belongings of the breath.
